

ULTRA HDF DOORS

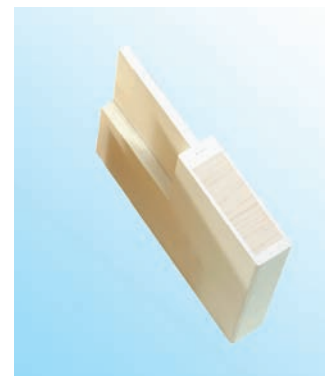

Smooth and Durable

You could sand wood all day and never make it feel as smooth as the finish on a Steves & Sons Ultra HDF door. Made with an LVL core and high density fiberboard, the Ultra HDF doors offer the weight and feel of solid wood, with a blend of craftsmanship and long-lasting beauty. The wide range of designs and the primed finish give you the flexibility to match the style of any home.

- Amazingly smooth surface
- Wood dowels are used at every stile and rail intersection so joints don't come apart
- Constructed from LVL core with an HDF (high density fiberboard) veneer
- Weight and feel of solid wood
- Excellent sound reduction
- Primed for painting to match any décor
- Variety of design options
